GCoin Whitepaper

1. Introduction

GCoin is an ERC-20 token designed to bridge utility, scalability, and community-driven growth. Our mission is to create a sustainable token economy that empowers users through transparency, security, and innovative Web3 use cases.

The GCoin ecosystem integrates DeFi, NFTs, and staking mechanisms to provide real value for holders, while also building unique projects that reflect cultural creativity and blockchain innovation.

2. Vision & Mission

Vision: To establish GCoin as a leading community-driven token in the Web3 ecosystem, delivering both financial opportunities and cultural value.

Mission: Build a sustainable token with real-world use cases, innovative integrations, and long-term growth potential through DeFi, NFTs, and gaming.

3. Tokenomics

Token Standard: ERC-20 (Ethereum + Polygon support)

Total Supply: 1,000,000,000 GCoin

Page 2

Distribution:

Pre-Sale Allocation: 500,000,000 GCoin (50%)

Liquidity Pool: 200,000,000 GCoin (20%)

Ecosystem & Development: 150,000,000 GCoin (15%)

Team & Advisors: 100,000,000 GCoin (10%) (locked & vested)

Community Rewards / Staking: 50,000,000 GCoin (5%)

Deflationary Mechanism: Any unsold tokens from the pre-sale will be burned, ensuring scarcity and value growth over time.

4. Utility & Use Cases

Staking & Farming: Earn rewards by providing liquidity or staking GCoin.

NFT Marketplace Integration: GCoin as the native currency for buying, selling, and upgrading NFTs.

Gaming: Integration with upcoming Web3 games (e.g., GCoin Legends, inspired by Iranian mythology & Axie Infinity model).

5. Roadmap

Q3 2025

Pre-sale launch & community expansion

Listing on DEX (Quickswap, Uniswap)

Initial marketing campaigns

Q4 2025

NFT integration & marketplace prototype

Staking & farming pools launch

Partnerships with Web3 communities

Q1 2026

Beta launch of GCoin Legends NFT game

CEX listing negotiations

Global marketing campaigns

Q2 2026 & Beyond

Full launch of GCoin Legends

Page 4

DAO governance model introduction

Expansion into real-world integrations

6. Community & Governance

GCoin is community-driven. Holders will shape the future of the ecosystem through DAO-based governance, enabling them to vote on proposals such as:

New staking pools

NFT launches & collaborations

Game features & upgrades

Treasury allocation

7. Conclusion

GCoin is more than just a token — it's a cultural and financial ecosystem built for the Web3 era. With deflationary tokenomics, strong community governance, and integrations across NFTs, DeFi, and gaming, GCoin is designed to provide lasting value and growth potential.
